## OVERVIEW

Standss is excited to announce the release of SendGuard Version 5 quarterly updates. This is a new release and contains new features, improvements, and bug fixes.

In this release, the significant update is the introduction of a new Standss Enterprise User Management to manage user subscriptions.

Users of previous versions will need to contact their account manager at Standss (or email us at [sales@standss.com](mailto:sales@standss.com)) to upgrade and get their new license information.

The following sections have more information on what's new, what's fixed and updates/deployment.

### SendGuard COM-Addin (Windows Desktop)

#### WHAT'S NEW

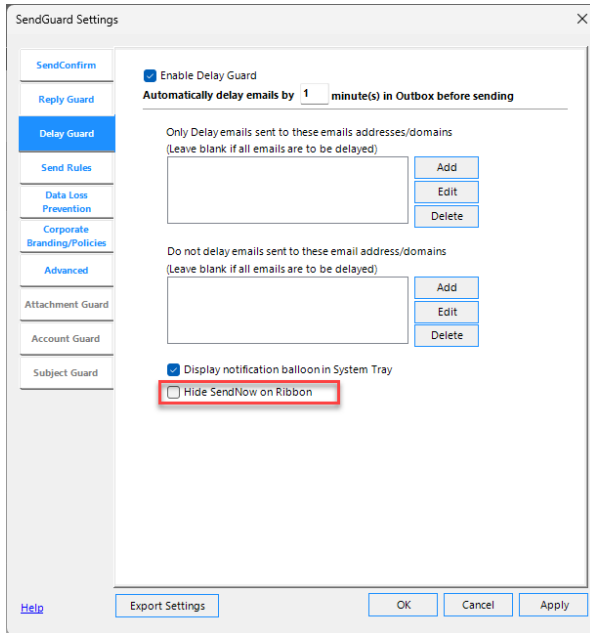

##### Integration to Standss New Enterprise User Management system

We have introduced the Integration with Standss latest Enterprise User Management system, allowing IT administrators to effortlessly manage users and subscriptions for SendGuard. This integration streamlines the licensing process, requiring only a subscription ID provided by your Account Manager.

With the introduction of the online portal, IT administrators now have easy access to the Subscription Management feature. They can log in to the portal and perform various tasks, including viewing, adding, and deleting users, all in one place. This new system enhances the overall user experience and simplifies the management of SendGuard licenses.

##### DelayGuard: Show/Hide Send Now Option from Outlook Ribbon

We have added a new feature to DelayGuard, providing IT Admins with the flexibility to Show/Hide the **SendNow** option from the Outlook Ribbon on the user's machines. The hiding of **SendNow** option will not let users to bypass Delay Send. You can access this functionality through the SendGuard Settings screen, as illustrated on the next page:

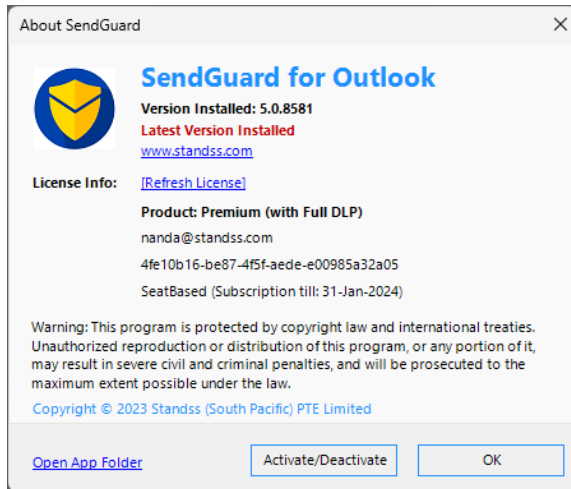

## Improvements

### Simplified About Screen

We have simplified the SendGuard About Screen to provide a cleaner and more user-friendly interface. The new design includes essential information about licenses while still being intuitive to navigate.

In addition to displaying the basic license details, the About Screen now incorporates more comprehensive information about licenses for better clarity. Moreover, for users utilizing the Enterprise User Management system, we have introduced a convenient "Refresh License" button. This button enables you to seamlessly update license information, ensuring it remains up-to-date and synchronized with the Enterprise User Management system.

## Fixes

### Outlook & Microsoft Viva Insight - Disconnect Issue Fixed

Good news! The disconnect issue between Outlook and Microsoft Viva Insight has been resolved. You can now use both applications seamlessly without interruptions. Upgrade to the latest version and enjoy a smoother and more productive experience with this critical fix.

### SendConfirm Blocking Users

The issue with SendConfirm blocking users from sending emails when using the "Show External Recipients (Security)" prompt type has been resolved. Previously, even after manually selecting all users from the prompt, the feature would still prevent email sending. The bug fix now allows users to send emails with the desired recipients properly selected from the prompt. The fix applies specifically to Meeting requests, ensuring consistent and smooth email sending while maintaining the security measures in place for external recipients.

## SendGuard M365 Addin (For Windows Desktop, Outlook Web Access & Apple Mac):

### WHAT'S NEW

#### New SendRules Feature: Attachment Size Warning

SendRules now has a new rule that checks if an email attachment exceeds a set threshold (X MB). When a large attachment is detected, users will receive a prompt warning about the size. This empowers your team to manage large attachments responsibly, preventing issues and promoting efficient communication.

## New SendRules Feature: Recipient Email Address & Domain Check

SendRules now performs a comprehensive check on recipient email addresses and domains. With this powerful addition, you can now verify the existence of both recipient email addresses and their corresponding domains before sending your emails.

When an invalid or non-existent recipient email address or domain is detected, our system will promptly trigger a user warning. This warning will alert you before sending the email, providing the opportunity to review and correct any potential issues, ensuring accurate email delivery.

## Integration to Standss New Enterprise User Management system

SendGuard M365 successfully integrates with Standss new Enterprise User Management system. With this seamless integration, IT administrators gain a wealth of powerful capabilities to manage users and subscriptions conveniently.

Using the intuitive Online portal, IT admins can effortlessly handle user management tasks, including adding, removing, and customizing user settings for SendGuard M365. This central platform streamlines the entire user management process, saving time and enhancing efficiency.

Furthermore, the Online portal grants IT administrators the flexibility to tailor settings specifically for SendGuard M365. Now, you can easily customize configurations to align with your organization's preferences, ensuring a personalized and optimized experience for all users.

This integration marks a significant advancement in user management and settings customization, elevating the efficiency and performance of SendGuard M365. Empower your IT team with these enhanced capabilities and experience the seamless integration with Standss New Enterprise User Management system today!

## Improvement

### DelaySend with Office.js API

The DelaySend feature now uses Office.js API, eliminating the need for the Microsoft Graph API. As a result, performing DelaySend on emails is now faster and more efficient than ever before.

With this improvement, you can seamlessly schedule email deliveries without additional API calls, reducing processing time and streamlining the entire process.

This optimization enables a smoother user experience while ensuring emails are sent at the desired time with greater speed and accuracy.

### DelaySend: Enhanced Recipient Control

DelaySend now allows you to apply delays selectively based on recipient types.

With this enhancement, you can now choose to apply Delay Send exclusively to External Recipients, Internal Recipients, or both (ALL).

By customizing the Delay Send settings according to recipient types, you gain better control over email delivery and ensure that your communications align with your organization's specific needs and policies.

Whether you want to prioritize internal communications or implement a brief delay for all recipients, this new feature offers the flexibility to meet your unique requirements.

## **DEPLOYING THE NEW VERSION:**

### MSI

Please contact your account manager at Standss or email us at [sales@standss.com](mailto:sales@standss.com) for a link to the latest file. We can assist you to deploy the new version with your existing or new settings.

### Use Group Policy Object (GPO) Templates (ADMX)

There has been some changes to the registry structure and as a result the ADMX template for deployment is done via GPO.

Please contact us at [sales@standss.com](mailto:sales@standss.com) for the updated ADMX/ADML file to deploy and maintain settings.

### Priority Updates

SendGuard offers an annual maintenance model which ensures that businesses get the best updates and support from our highly skilled staff.

### Deploy using Microsoft Intune

SendGuard for Outlook is a per-machine software and therefore can be deployed via Intune. SendGuard will be installed silently if all registered devices are set-up correctly.

Please contact us at [sales@standss.com](mailto:sales@standss.com) for assistance regarding deployment using Microsoft Intune.

### Deploy SendGuard M365 using Office 365 Admin Centre

You can utilize Office 365 Admin Centre to deploy SendGuard for M365. If you have previously deployed the add-in, there is no need for redeployment as the new updates have already been pushed out. If you wish to modify your settings or require additional information regarding the deployment of SendGuard M365, please reach out to your account manager or contact [sales@standss.com](mailto:sales@standss.com)
